

**VOICELINK
COMPANY**

ABOUT A COMPANY

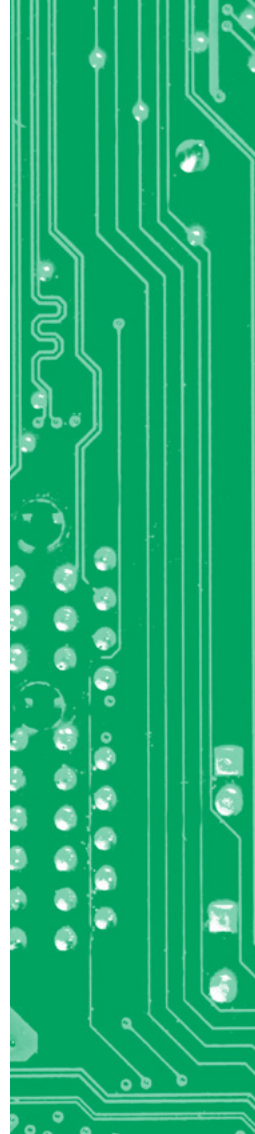

VoiceLink is a high-tech company in the area of information technologies and system integration. The Company has been working in IT market since 2006.

Our partners are the leading Russian and world manufacturers of hardware and software. This fact enables the Company to meet the needs of every client and to customize the solutions in every business areas, as well as to develop its own solutions and the projects of a group of companies.

Back in 2020, VoiceLink joined Rostelecom PJSC. They implement in-house solutions under the Federal Program "Secure City" and develop a system of digital smart services.

IN-HOUSE SERVICES AND SOLUTIONS

SmartTraffic ATCS

SmartTraffic Automated Traffic Control System is designed for automatic management and more organized traffic by regulating the traffic. Traffic streams in the city road networks are the manageable objects in the System. SmartTraffic ATCS is a modular system with specialized subsystems installed under the client's needs with a possible future secure integration with the third party systems.
